

I would like to encourage the continued support of free access to XM radio including the many varied offerings of music, information, news, and traffic and weather. While most of my driving is in a local area, the times my husband and I travel we find the availability of all the programming now offered by XM. We would respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming we enjoy and support through our monthly payments.

Thank you.
